

DEPARTMENT OF CLINICAL HAEMATOLOGY

SENIOR CLINICAL SCIENTIST
Leukaemia Cytogenetics

Grade B (17-22 depending on experience)
£32,537 - £39,582 p.a. • Full-time

An opportunity has arisen for an experienced Cytogeneticist to join the Haemato-Oncology team within this friendly and progressive department. Applications are invited from highly motivated individuals with experience in haematology to work in the challenging and interesting field of haematological malignancy. The successful applicant will lead the section and take day-to-day responsibility for cytogenetic analysis on a wide range of paediatric and adult haematological malignancies.

The cytogenetics section is integrated with phenotyping and molecular genetics and provides the Haemato-Oncology Diagnostic Service to the Eastern Region. It has close links with the University of Cambridge Haematology Department (Professor Tony Green) through which participation in research and development is encouraged.

This post offers excellent opportunities to broaden experience within our multidisciplinary team approach to the diagnosis and monitoring of haematological malignancies. Further professional development is actively encouraged within the Department of Clinical Haematology and through links with the on-site regional Genetics laboratories. You should be state registered or eligible for state registration.

For further information, or to arrange an informal visit, please contact Dr Mike Scott, Consultant Clinical Scientist, on +44 (0) 1223 548027.
