Clinical Laboratory Geneticists

About Basics

In accordance with the goals of the EBMG our Professional Branch Board has opened the possibility for recognition of practitioners / non-Medical Doctors working in Human Genetics diagnostics laboratories to be recognized as European registered Clinical Laboratory Geneticists (ErCLG).
A **core curriculum** for the ErCLG was established in 2012 and slightly revised in 2015.

Profile

The speciality profession ErCLG comprises all elements of genetic laboratory services related to the provision of medical genetics services to patients or families.
CLG is a **laboratory speciality on an academic level** that joins all aspects of human genetic diagnostics in one skilled profession; the specialist has **deep knowledge of laboratory services, procedures and results interpretation** related to genetic disorders and health issues related with genetic factors.
The holders of the ErCLGs title have a certificate that they achieved the same level of competence as peers in Europe (independent if their country has a national educations scheme or not).

European Registration Process

How to Submit

Step 1

Start application between **August 1st and September 15th** each year.

Step 2

If you apply with a **national CLG certificate** find out if this makes you an applicant from a group 1 or group 2 country.
If you have **no national CLG certificate** you apply from a group 3 country.

In case **your country is not listed** at the website then you have to contact Dr. Thomas Liehr.
(Thomas.Liehr@med.uni-jena.de)

Step 3

Find out if you are eligible to submit an application by **fulfil general and the group criteria.**

Step 4

Collect all necessary papers for online submission, and use our online submission system (only active between August 1st and September 15th in each year and between November 30th, and January 15th of the following year).

European Registration Process

Criteria

General

General criteria **to be fulfilled** by all applicants from groups 1, 2 and 3 countries:

Hold an M.Sc. and/or PhD qualification.

Work under a contract for at least 5 years in Human Genetics (minimum of 200 reports per year).

Applicants working for more than 7 years should have signed reports during at least 3 of the last 5 years.

Follow the code of professional practice for clinical laboratory geneticists in Europe.

Ongoing education: at least 35 hours per year during last 2 years.

Fee has to be paid after pre-evaluation.

Specific

Specific criteria for groups 1, 2 and 3 must be consulted at <https://www.eshg.org/587.0.html>
