Oncogenetic area coordinator

Sistemas Genomicos is a biotechnology company dedicated to the research and diagnosis of patients suffering from hereditary pathology. Its mission is to put genetic research at the service of society.

Sistemas Genómicos is a company committed to Equal Opportunities.

We are currently looking for an Area Coordinator, to be incorporated into our Molecular Diagnostic Laboratory, to lead and develop the different projects and tasks that are developed in the team. Its main functions will be:

a. To plan, organize, advice, direct and coordinate the Oncogenetic group in the Medical Genetics Unit.
b. Coordinate, monitor and sign the molecular diagnostic reports.
c. Guarantee the fulfillment of the defined objectives.
d. Scientific-technical advice to clients and commercial department in the oncological area.
e. Give talks and lectures (in Spanish and English).
f. Supervision and training of personnel under his charge.
g. Resolution of incidents, requests for improvement and new developments together with the personnel involved.
h. Promote research projects aimed at the development of new oncological diagnostic services, personalized medicine and pharmacogenetics.

REQUERIMENTES:

1. Degree in Health sciences and doctorate in áreas related to genetics.
2. Demonstrated experience in Oncogenetics and genetic susceptibility.
   - Molecular diagnosis of familial cancers (germinal).
   - Genes altered at the somatic level in sporadic cancers.
   - Genetic susceptibility
3. Knowledge in cancer treatment and personalized medicine.
4. Dexterity in the analysis of Sanger sequencing data, NGS, Exoma, qPCR, ddPCR, etc.
5. Skill in the management of databases for the classification of variants: HGMD, Clinvar, BIC, Leiden, Cosmic, OMIM, Gene Reviews, etc.
6. Knowledge of bioinformatics tools (Alamut, Seqscape, Gene Mapper, etc).
7. Experience in preparing reports.
8. Great capacity for work.
9. High level of English and Spanish.

Remunered is offered depending on the value and experience of the candidate.

Interested candidates must send a letter of introduction, indicating their experience in the technical requeriments of the post to recursoshumanos@ascires.com
