

Genetic Services Quality Committee

Ros Hastings

Aims:

- Identify gaps in quality issues within diagnostic testing services:
- Harmonisation between Biochemical, Molecular and Cytogenetic disciplines.
- Commission and approve new documents relating to quality in genetic testing
- Give recommendations for those countries where no guidance is currently available

Achievements

- Symposium on 'Changing landscape of genetic testing with PPC.
- Annual reports from European EQA providers
- Data on poor performance
- Determining satisfactory performance
- Reference Materials for FraX, PWS/AS and BCR/ABL adopted by WHO with input and support from GSQC

How can you help?

- Let the GSQC know of quality issues that need attention

- Let us know of country specific issues that affect quality in your country

- What are the obstacles to producing a quality system

or accreditation?

- Disseminate information about the GSQC

- Newsletter/ESHG website
